Book The rise of part-time work: A German-French comparison

Labour Force Survey, Voluntary part-time work is substantially more widespread among women in Germany than it is in France. This paper uses data from the 2007-2008 survey to examine the employment among women in France and Germany using micro data. The results show that part-time work is substantially more widespread among women in Germany than it is in France. This is true for both full-time and part-time workers. The results also show that part-time work is more widespread among women in Germany than it is in France. This is true for both full-time and part-time workers. The results also show that part-time work is more widespread among women in Germany than it is in France. This is true for both full-time and part-time workers.
